Support the Fight Against COVID-19 with Data at HHS [Data and Analytics Intern]

Project Title	Support the Fight Against COVID-19 with Data at HHS [Data and Analytics Intern]
Project Summary	You will contribute to the fight against COVID-19 by supporting the design of data visualizations to support decision makers in the Federal Government. Using open data, you will be responsible for showing the current state of the virus and building models to determine the next best steps.
Country	United States

Project Description

The Federal Government is taking a Whole of America approach in responding to the COVID-19 Pandemic. This project will support the analytics team within the HHS Office of the Chief Information Officer. You will be responsible for finding data, onboarding data, and creating actionable visualizations and models to support decision making. If you are an avid reader of Reddit's /r/dataisbeautiful or were ever inspired by the works of Edward Tufte, this is the internship for you!!

This internship will require regular, consistent commitment of time to ensuring quality data. Having set, reasonably consistent blocks of time per week to dedicate to this internship is strongly recommended.

Key skills required of all interns are:

- Willingness to learn/adapt
- Strong acumen for quality and ability to complete detailed work with limited errors
- Can-do, positive attitude
- Self-management and self-organizing with limited direction
- Problem solving
- Interest in public service

Required Skills or Interests
